WORK EXPERIENCE

AWS Cloud Captain   2024

My work as an AWS Cloud Captain and the founder of the first AWS Cloud Club in Tunisia demonstrates my commitment to innovation, education, and technological advancement. I'm not not just shaping my career, but also the future of cloud computing in Tunisia.

Freelancer

Voti w Ansa

I've worked on a website for elections that allows users to vote for candidates selected by organizations created by users. You can create a profile and customize it; your information is fully encrypted and secured. This website aims to solve the problems of forging papers and fake votes, as every user is verified by the team and their Citizen Identification Number (CIN).

Connecti

Introducing Connecti is a social media app that seamlessly connects you with friends. Share moments through posts, enjoy personalized content, and engage in private messaging and video calls. With a user-friendly interface and top-notch security, it's a dynamic platform for meaningful connections and vibrant content sharing. Welcome to a new era of social interaction!

TML: Tunisian movies lovers

i've worked on a website that auto import movies from IMDB and display them for users without ads with many features like watching the full version of the movie for free with 12 servers for streaming, user can create and account and like movies and bookmark them or go back to history and see what movies he watched

Khamem 9bal Matejbed

Embark on a new and amusing game experience centered around posing entertaining questions to your friends. Dive into a plethora of quirky inquiries designed to spark laughter and lively conversations, creating a dynamic and enjoyable social atmosphere. With a diverse range of thought-provoking prompts, this game ensures a unique and fun-filled interaction that promises hours of entertainment with friends.
